Is An Organic Approach Really Important?

Yes - Genuine organic products protect water systems by reducing the daily syn-chemical runoff, even when just washing your hair...

In USA over 6.2 billion harmful ounces of chemicals and synthetics from shampoo/cond. are washed down the drain, into rivers, lakes and oceans, every single day.

Let's Go Organic!

Professional Organics™, Salon & Spa

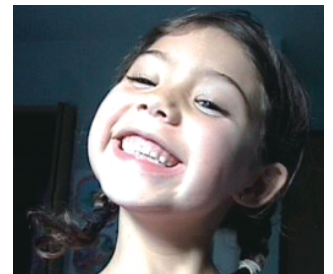

Revolutionary, professional shampoo and conditioner with certified organic herbal blends now available in professional quality formulations. Supporting your sales with proprietary organic and private label technologies.

Professional organic products for salon and spas that will keep your customers happily coming back - again and again...

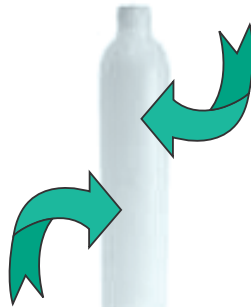

Let's be the change & make ethical money!
